摘要	伴隨著益趨激烈的競爭環境,企業對時、空優勢的掌握益形重要。也因此,近年來物
	流對企業價值活動所締造之貢獻,業已成為實務界之共識。本文依據「環境-策略-
	結構-績效」(E-S-C-P)競爭架構之基礎,建立了一個探討環境不確定性、物流策略、
	組織間統制、以及物流績效之理論架構。在實證研究方面,本文以中華徵信公司排名
	1000 大的國內廠商為對象,研究結果發現對物流策略的重視程度、適當的組織間統

Abstract	In the complex and uncertain environment, the logistics strategy may create the company's
	value.Recently, global logistic management is an emerging paradigm. Bases on the
	traditional "Environment - structure - conduct - performance " framework , this paper
	proposes a conceptual framework on environment uncertainty \(\) logistics strategy \(\)
	interorganizational governance and logistic performance. For the empirical study, we
	design a questionnaire to survey the Taiwanese top 1000 companies. And we find the
	environmental factors \(\cdot \) interorganizational governance mechanism \(\cdot \) and relational norms
	all affect the logistics performance. Finally, the practical and academcial implications also
	suggested in the conclusion.
Key Words	Environmental uncertainty \ Logistics strategy \ Interorganizational governance \ \
